Summary

Almost 4 decades of experience (since 1979 with Apple IIe BASIC and 6502 assembly) covering all aspects of software and systems design, including development, testing, implementation and support. Major clients include the US Postal Service, Paxis (a Lockheed Martin subsidiary), AEG (now Siemens, Germany), ECA (a Siemens subsidiary), Washington GAS, ARINC (Aeronautical Radio Inc.), COMSAT, and LocalNet LLC.

Over 16 years of intimate involvement with the US Postal Service automation effort. Contributed key sorting concepts, and implemented software and systems. Was an Integral member of the team that created the first PC-driven bar code sorter, and later, Delivery (DBCS) and Carrier (CSBCS) sorters. Developed simulation programs for mail flow and sort validation, and provided testing, and modifications for existing systems, and operations.

Over 20 years of working with the Internet and following the evolving frontend and backend technologies.

Previous positions held: Software Engineer, Project Manager, Consultant, and Senior Manager of various development groups.

- Owned and operated successful software development, and web design, hosting and management companies. Served as the CTO of several web startups, and consulted on several high-tech Internet-related enterprises.
- Proven long-term track record of identifying areas of anomaly in process control and data flow in various settings, and in assessing and creating efficient and practical solutions.
- Active member of the web/internet industry since 1997, managing the online presence of the Israeli embassy in the US. Responsible for creating, hosting and maintaining custom sites for various businesses and individual clientele.
- Specialization in database driven applications, and content management. Recognized for publishing an award winning arts guide. Monitored and supervised the implementation of on-line tickets sales for international production company Teev-Events. Led the development of tailored CMS for myriad clients.

Objective

Currently seeking a new and challenging opportunity in the high-tech industry, in a consulting, managing or hands-on position. As a member of your team I will:

- Quickly grasp your objective
- Formulate a plan of action that is in line with stakeholder's objectives
- Assess and utilize your resources to maximum potential
- Supervise, delegate, motivate, and inspire assembled teams and individual contributors
- Perform any required task with diligence and dedication
- Deliver on-time and within-budget effective and efficient solutions.

Education

BA (Cum Laude) University of MD, 1978, Communication and Marketing.

Continuing professional education includes ongoing participation in a wide variety of business and software related classes and seminars

Languages

Web Languages: HTML5/CSS3, Java Script, AngularJS, jQuery, Bootstrap. Proficient with **PHP** and frameworks such as **Laravel, Yii** and **FatFree**, works with **MySQL** and **MongoDB** databases and processing **JSON** data. Works with CSS compilers (**SASS & LESS**). Good Working knowledge of **CMSs** such as **WordPress, Drupal, Joomla, Concrete5**. Following and 'playing' with latest technologies, frameworks and platforms.
